Watershed Watch

Watershed Watch is an intensive water quality monitoring program in the Rideau and Mississippi Valley Watersheds. Volunteers can help to collect a reliable and accurate set of baseline data to act as an early warning system to identify trends or problems in water quality.

www.rvca.ca/programs/wwatch/watershed_watch.htm	
	(Rideau)
www.mvc.on.ca/index.php/stewardship/watershed	
	(Mississippi)

Invading Species Watch

Invading Species Watch program offers local residents, cottagers, and property owners the unique opportunity to monitor their lakes for the presence of aquatic invasive species such as zebra mussels and spiny water flea at minimal cost.

	www.invadingspecies.com
--	-------------------------

Canadian Lakes Loon Survey

Canadian Lakes Loon Survey was founded as a long-term project of Bird Studies Canada to monitor the numbers and breeding success of loons on lakes across Canada.

www.bsc-eoc.org/clismain.html

Canadian Breeding Bird Survey

www.bsc-eoc.org/bbsont.html

Nocturnal Owl Survey

The goal of this survey is to monitor owl populations in Ontario to determine whether owls are being affected by logging practices.

www.bsc-eoc.org/owls.html

Ontario Birds at Risk Program

The goal of OBAR is to work towards the protection and recovery of vulnerable, threatened, endangered, and other bird species at risk in Ontario.

www.bsc-eoc.org/obar.html

Marsh Monitoring Program

This program is designed to provide information on marsh bird and selected amphibian populations, and to contribute to our understanding of their habitat needs.

<http://www.bsc-eoc.org/mmpmain.html>

NatureWatch

NatureWatch is a suite of community based monitoring programs that are administered through a partnership between the EMAN Ecological Monitoring and Assessment Network), Conservation Ontario, the Canadian Nature Federation, and the University of Guelph: FrogWatch, IceWatch, PlantWatch, WormWatch, DandelionWatch

www.naturewatch.ca/english

Ontario Turtle Tally

Collect, record and store location and species information on Ontario turtles, including species at risk.

www.torontozoo.com/adoptapond/TurtleTally.asp

The Great Backyard Bird Count

Collected data is combined with Christmas Bird Count and Project FeederWatch data to provide an immense picture of our winter birds.

www.birdsource.org/gbbc

Project Feeder Watch

Project FeederWatch is a winter-long survey of birds that visit feeders at backyards, nature centers, community areas, and other locales in North America.

www.birds.cornell.edu/pfv

Clam shells in a Bag

Native mussels throughout North America have long been declining due to harvesting, sedimentation, pollution and the introduction of zebra mussels. Dead shells can be collected and sent to Fred Schueler for identification and the data will be added to the Canadian Freshwater Mussel Working Group's database. Bishop Mills Natural History Centre

www.pinicola.ca

Ontario Hummingbird Project

The goals of the Ontario Hummingbird Project are to identify migration routes, document spring arrival and fall departure dates, define the northern limits of the breeding range, study the nesting cycle, popular estimates, reproduction rates and birds returning to the same locality each year.
