

# How To Assess Your Property to Help Protect Freshwater Health

Have you ever wondered how to naturalize your shoreline? What should you and your family be looking for on your property that might impact water quality and wildlife habitat availability? Chloe and Monica from Watersheds Canada will walk you through a property assessment to show you what our staff look for on a property that can help protect freshwater health and provide crucial habitat for wildlife. This is a free, family-friendly webinar.

**Wednesday, September 22, 2021 from 7-8pm**

**Register: [watersheds.ca/webinar2](https://watersheds.ca/webinar2)**

This webinar is part of a project generously funded through Wildlife Habitat Canada's Community Conservation Action Program.
